**METHOD FOR SUPPLYING A LABELLING LINE, AND LABEL
SUPPORT USED IN SUCH METHOD**

5

The present application relates to a method of supplying a
labelling line with objects, in particular bottles (8), consisting in:

- 10 a) in a first supply station (1), providing a support (5) which has self-adhesive
labels (6, 7) stuck to both sides of it;
b) moving the support (5) so as to pass it through a first labelling station (2)
supplied with the said objects (8), the objects (8) being labelled by using the
labels (7) affixed to the first face of the support (5); and
15 c) moving the support (5) so as to pass it through a second labelling
station (2), the objects (8) being labelled in the second labelling station by
using the labels (6) affixed to the second face of the support (5).
